Detailed Solutions — Conceptual Questions (Module 04)

- **Q1 Solution**: `while` checks the condition before entering the body (executes `0` or more times); `do-while` checks the condition after executing the body (executes at least `1` time).
- **Q2 Solution**: Only integral types (`int` , `char` , `short` , `long` , `long long` , `bool`) and enumeration types (`enum` , `enum class`).
