21 STL AND MODERN CPP • THEORY

03 iterators algorithms and modern cpp23

Detailed Theory, Exact C++ Rules, Memory Models & Exam Reference

03 — Iterators, `<algorithm>`, and C++17/20/23 Structured Bindings

CPP

```cpp
for (const auto& [roll, marks] : student_map) {
    cout << roll << " → " << marks << endl;
}
```

C++20/C++23 also provides `std::ranges::sort(vec)` and `.contains(key)` on `std::map` and `std::set`.
